

Blended Intensive Programme by SVAKO, **Partner**

Entrepreneurship and Leadership

Online: 22-03-2023

Face-to-face at Šiauliai State HEI (Lithuania): 17-04-2023 – 21-04-2023 (5 days)

Language of instruction: English

Credits: 3 ECTS

No registration fees (maximum 30 students)

Online session:

- ✓ Are you interested in entrepreneurship and/or leadership?
- ✓ Would you like to know what the modern concept of entrepreneurship and leadership is? How are those concepts interrelated?

Contact week:

- ✓ What does it mean business according to your lifestyle?
 - ✓ Would you like to try yourself in entrepreneurship?
 - ✓ Would you like to work in intercultural groups and try to solve real problems/challenges of concrete companies?
- If yes, apply to

Working in mixed groups and applying the Hackathon methodology, students will not only theoretically get acquainted with modern concepts of entrepreneurship and leadership, explain their interrelationships, essence and importance, but also practically examine real cases of specific companies - challenges. They will try different strategies and techniques and will develop entrepreneurship and leadership competencies in both professional and personal activities. Teamwork, problem-solving, international and intercultural cooperation and communication skills will also be developed. All this will enable them to re-evaluate their competencies in the context of relevant attitudes such as openness to innovation and otherness, personal and social responsibility, and lifelong learning. Excursions to the companies and enterprises will be organised.

BIP GENERAL INFORMATION

ACCOMMODATION: We offer students to stay at the SVAKO Youth hostel or Student dormitory.

REGISTRATION LINK:

Registration deadline is 10th March 2023

Certification: All students who successfully complete the BIP will be issued a certificate.

About SVAKO:

The Šiauliai State Higher Education Institution (SVAKO) was established in 2002. SVAKO delivers a spectrum of study programmes with a strong emphasis on market needs. Now offering more than 20 study programmes belonging to science field groups of informatics, engineering, social, health, business and public management. Each Year Šiauliai State Higher Education Institution prepares several hundred professional bachelors. 1,500 students are studying at a higher education institution with more than 100 teachers. Šiauliai city and the Šiauliai region are famous for their engineering industry traditions; therefore, specialists trained at SVAKO in various fields are wanted in modern companies.

Regionally-oriented applied research is the main pillar of both studies and innovation activities at SVAKO. This is achieved by an extensive regional and national partnership network, which significantly influences the scope of its applied research activities.
